

**LEVI WATER SUPPLY CORPORATION  
NON-STANDARD SERVICE APPLICATION**

Please Print or Type

Applicant's name/Company \_\_\_\_\_

Address/City/State/ZIP: \_\_\_\_\_

Phone number (\_\_\_\_) \_\_\_\_\_ - \_\_\_\_\_ FAX (\_\_\_\_) \_\_\_\_\_ - \_\_\_\_\_

E-mail \_\_\_\_\_

Please attach a legal description of the proposed development as listed in deed records as a filed plat or parcel of land where other types of non-standard water/sewer service is requested. Plat requirements include: name of subdivision, owner/developer's name, lot sizes and lot lines, lot numbers, right of way dimensions and dedicated utility easements, legal description, highway and county road numbers, total acreage, adjoining property owners, flood plain, and vicinity map. Instrument must show proof of ownership; preliminary plats are acceptable for discussion purposes but an "approved plat" must be provided before contract closing.

Check type of service application or development:

- ☐ Residential Subdivision    ☐ Multi-family    ☐ Mobile Home Park    ☐ Trailer Park  
☐ School    ☐ Line Extension    ☐ Commercial/Industrial Park    ☐ Large Meter (>1")  
☐ Multi-use Facility    ☐ Other

Please list all water demand criteria for each meter or meter equivalent, or attach any engineering studies completed for the proposed service:

\_\_\_\_\_  
\_\_\_\_\_

Maximum number of proposed lots: \_\_\_\_\_ Range of standard lot sizes: \_\_\_\_\_

Acreage \_\_\_\_\_

Please describe in detail the nature and scope of the project/development.

Initial needs \_\_\_\_\_  
\_\_\_\_\_

Phased and final needs, including a map showing each phase, and the projected land uses that support the requested level of service for each phase.

\_\_\_\_\_  
\_\_\_\_\_

Please list any additional special service needs not listed above.

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Please provide the flow, pressure and infrastructure needs for anticipated level of fire protection requested or required by ordinance, including line sizes and capacity.

\_\_\_\_\_  
\_\_\_\_\_

Please provide the timeline for initiation of this service, and for service to each additional or projected phase following initial service, including a schedule of events leading up to the anticipated date of service. Specify this for all additional or projected phases.

\_\_\_\_\_  
\_\_\_\_\_

Please describe how the utility may access the property during evaluation of application.

---

**Please attach the following information, as applicable:**

- A proposed calendar of events, including design, plat approval, construction phasing and initial occupancy.
- If applying for a single tap that requires a line extension, road bore, or upsizing of facilities, maps or plans detailing the location of the requested service installation and/or extension and details of demand requirements.

**Required Fees**

Applicant is required to pay a Non-Standard Service Investigation Fee of \$ (see attached) to the Corporation in accordance with Section G of the Corporation's tariff for purposes of paying initial administrative, legal, and engineering fees. The Corporation will refund any balance that remains after it has completed its service investigation, and has completed all legal and engineering services associated with processing a request.

In the event the Investigation Fee is not sufficient to pay all expenses incurred by the Corporation, the Applicant agrees to pay all additional expenses that have been or will be incurred by the Corporation and Corporation will have no obligation to complete processing of the Applications until all remaining expenses have been paid.

**Corporation's response to service request**

The Corporation will prepare a written response to Applicant's service request within 90 days from the date the application was submitted and the required fees were paid. The Corporation's response will state whether the requested service can be provided, the timeframe within which it can be provided, and the costs for which the Applicant will be responsible, which may include capital improvements, easements or land acquisition costs, and professional fees.

*Applicant has received and reviewed Section F of the Corporation's tariff and agrees to comply with all the requirements contained therein.*

*Under penalties of perjury, I declare that I have reviewed the information presented in this Application, including accompanying documents, and to the best of my knowledge and belief, the information is true, correct and complete.*

## **SECTION F**

# **DEVELOPER, SUBDIVISION AND NON-STANDARD SERVICE REQUIREMENTS**

## **SECTION F. DEVELOPER, SUBDIVISION AND NON-STANDARD SERVICE REQUIREMENTS**

**Part I. General Requirements.** This section details the requirements for all types of non-standard service requests.

1. **Purpose.** It is the purpose of this Section to define the process by which the specific terms and conditions for service to subdivisions and other kinds of Non-Standard Service are determined, including the Non-Standard Service Applicant's and the Corporation's respective costs.

For purposes of the Section, the term "Applicant" shall refer to the individual or entity that desires to secure Non-Standard Service from the Corporation. The Applicant must be the same person or entity that is authorized to enter into a contract with the Corporation setting forth the terms and conditions pursuant to which Non-Standard Service will be furnished to the property. In most cases, the Applicant shall be the owner of real property for which Non-Standard Service is sought. In the event that the Applicant is other than the owner of real property, the Applicant must furnish evidence to the Corporation that it is authorized to request Non-Standard Service on behalf of such owner, or that it otherwise has authority to request Non-Standard Service for the real property.

2. **Application of Rules.** This Section is applicable to subdivisions, additions to subdivisions, developments, or whenever additional service facilities are required for a single tract of property. Examples of non-standard services for a single tract of land can include, but are not limited to, road bores, extensions to the distribution system, service lines exceeding 3/4" diameter and service lines exceeding 50 feet. Non-residential or residential service applications requiring a larger sized meter typically will be considered non-standard. For the purposes of this Tariff, Applications subject to this Section shall be defined as Non-Standard. This Section may be altered or suspended for planned facility expansions when the Corporation extends its indebtedness. The Board of Directors of the Corporation or their designee shall interpret on an individual basis whether or not the Applicant's service request shall be subject to all or part of the conditions of this Section.

This Section sets forth the general terms and conditions pursuant to which the Corporation will process Non-Standard Service Requests. The specific terms and conditions pursuant to which the Corporation will provide non-standard service in response to any request will depend upon the nature of such request and may be set forth in a legally enforceable, contractual agreement to be entered into by the Corporation and the service Applicant. The agreement may not contain any terms or conditions that conflict with this Section.

3. **Non-Standard Service Application.** The Applicant shall meet the following requirements prior to the initiation of a Non-Standard Service Contract by the Corporation:
  - a. The Applicant shall provide the Corporation a completed Non-Standard Service Application (See Section I this Tariff). The Applicant shall specify any Special Service Needs, such as large meter size, size of subdivision or multi-use facility.
  - b. A final plat (see Tariff Definition Section- Final Plat) approved by the Corporation must accompany the Application showing the Applicant's requested service area. The plat must be approved by all governmental authorities exercising jurisdiction over lot sizes, sewage control, drainage, right-of-way, and other service facilities. Plans, specifications, and special requirements of such governmental authorities shall be submitted with the plat. Applicants for single taps involving extension or upsizing of facilities shall be required to submit maps or plans detailing the location of the requested extension and details of demand requirements.

**NOTE:** It is the responsibility of the Applicant to secure all necessary approvals of the subdivision once an Agreement is in place between the Corporation and the Applicant.

- c. A Non-Standard Service Investigation Fee shall be paid to the Corporation in accordance with the requirements of Section G of this Tariff for purposes of paying initial administrative, legal, and engineering fees. The Corporation shall refund any balance that remains after it has completed its service investigation, and has completed all legal and engineering services associated with processing a request. In the event such a fee is not sufficient to pay all expenses incurred by the Corporation, the Applicant shall pay to the Corporation upon the Corporation's request all additional expenses that have been, or will be incurred by the Corporation and Corporation shall have no obligation to complete processing of the Application until all remaining expenses have been paid.
- d. If after the service investigation has been completed, the Corporation determines that the Applicant's service request is for property located, in whole or in part, outside the area described in the Corporation's Certificate of Convenience and Necessity, service may be extended provided that:
  - 1). The service location is not in an area receiving similar service from another retail Corporation;
  - 2). The service location is not within another retail Corporation's Certificate of Convenience and Necessity; and
  - 3). The Corporation's Certificate of Convenience and Necessity shall be amended to include the entirety of Applicant's property for which service is requested. Applicant shall pay all costs incurred by Corporation in amending its CCN, including but not limited to engineering and professional fees. If the service location is contiguous to or within one-fourth (1/4) mile of Corporation's Certificate of Convenience and Necessity, Corporation may extend service prior to completing the amendment to its CCN, but will do so only upon Applicant's legally enforceable agreement to fully support such amendment (including but not limited to payment of all professional fees, including legal, surveying and engineering fees incurred by Corporation in securing the amendment).
4. **Design.** The Corporation shall approve the design requirements of the Applicant's required facilities prior to initiation of a Non-Standard Service Contract in accordance with the following schedule:
  - a. The Corporation's engineer shall design, or review and approve plans for, all on-site and off-site service facilities for the Applicant's requested service within the Corporation's specifications, incorporating any applicable municipal or other governmental codes and specifications.
  - b. The engineer's fees shall be paid out of the Non-Standard Service Investigation Fee under Tariff Section F 3.
  - c. The engineer shall submit to the Corporation a set of detailed plans, specifications, and cost estimates for the project.
  - d. The Corporation's engineer shall ensure that all facilities for any Applicant meet the demand for service as platted and/or requested in the plans or plat submitted in application for service. The Corporation reserves the right to upgrade design of service facilities to meet future demands provided however, that the Corporation shall pay the expense of such upgrading in excess of that which is reasonably allocable to the level and manner of service requested by the Applicant.
  - e. The Corporation's engineer will determine the fireflow design for any non-standard service request, including new subdivisions, based on density, type of structure, and other factors.
5. **Non-Standard Service Contract.** Applicants requesting or requiring Non-Standard Service **may** be requested to execute a written contract, drawn up by the Corporation's Attorney (see example Section I Sample Forms), in addition to submitting the Corporation's Non-Standard Service

Application. Said contract shall define the terms of service prior to construction of required service facilities. The service contract may include, but is not limited to:

- a. All costs associated with required administration, design, construction, and inspection of facilities for water/sewer service to the Applicant's service area and terms by which these costs are to be paid.
- b. Procedures by which the Applicant shall accept or deny a contractor's bid, thereby committing to continue or discontinue the project.
- c. Terms by which service capacity shall be reserved for the Applicant and duration of reserved service with respect to the demand which the level and manner of the service will have upon the Corporation's system facilities.
- d. Terms by which the Applicant shall be reimbursed or compensated for fees duplicated in assessments for monthly rates and Equity Buy-In Fees.
- e. Terms by which the Corporation shall administer the Applicant's project with respect to:
  1. Design of the Applicant's service facilities;
  2. Securing and qualifying bids;
  3. Execution of the Service Contract;
  4. Selection of a qualified bidder for construction;
  5. Dispensing advanced funds for construction of facilities required for the Applicant's service;
  6. Inspecting construction of facilities; and
  7. Testing facilities and closing the project.
- f. Terms by which the Applicant shall indemnify the Corporation from all third party claims or lawsuits in connection with the project.
- g. Terms by which the Applicant shall dedicate, assign and convey to the Corporation all constructed facilities and related rights (including contracts, easements, rights-of-way, deeds, warranties, and so forth) by which the Corporation shall assume operation and maintenance responsibility for the Applicant's project. The Applicant shall also provide reproducible as-built drawings of all constructed facilities. The as-built drawings must verify that all facilities have been properly located within the easements conveyed to the Corporation.
- h. Terms by which the Board of Directors shall review and approve the Service Contract pursuant to current rules, regulations, and bylaws.

6. ***Construction of Facilities by Applicant Prior to Execution of Service Contract.*** – The Corporation and the Applicant must execute a Non-Standard Service Contract prior to the purchase of supplies and materials or initiation of construction of facilities by the Applicant. In the event that the Applicant commences construction of any such facilities prior to execution of a Contract with the Corporation, then the Corporation may refuse to provide service to the Applicant or, in a subdivision, to any person purchasing a lot or home from the Applicant. Alternatively the Corporation may require full costs of replacing/repairing any facilities constructed without prior execution of a contract from any person buying a lot or home from Applicant. At a minimum, the Corporation will require that all facilities be uncovered by the Applicant for inspection by the Corporation, require that any facilities not approved by the Corporation be replaced, and take any other lawful action determined appropriate by the Board of Directors of the Corporation.

7. ***Dedication of Water System Extension to WSC.***

- a. Upon proper completion of construction of all on-site and off-site service facilities to meet the level and manner of service requested by the Applicant (the "Facilities"), the Facilities shall become the property of the Corporation. The Facilities shall thereafter be owned and

maintained by the Corporation subject to the warranties required of Applicant under Subsection (b). Any connection of individual customers to the Facilities shall be made by the WSC.

- b. Upon transfer of ownership of the Facilities, Applicant shall warrant materials and performance of the Facilities constructed by Applicant for 12 months following the date of the transfer.

**8. *Property and Right-of-Way Acquisition.*** – With regard to construction of facilities, the Corporation shall require private right-of-way easements or purchase of private property as per the following conditions:

If the Corporation determines that right-of-way easements or facility sites outside the Applicant's property are required, the Applicant shall secure easements or else title to facility sites in behalf of the Corporation. All right-of-way easements and property titles shall be researched, validated, and filed by the Corporation at the expense of the Applicant. (See Sample Application Packet RUS Form 442-8 or 442-9 (Rev. 6-06))

- a. All additional costs associated with facilities that must be installed in public rights-of-way on behalf of the Applicant, due to the inability of the Applicant to secure private right-of-way easements, such as including road bores and TxDOT approvals shall be paid by the Applicant. Alternatively, Applicant shall pay all costs, including legal and other professional fees and the condemnation award in the event Corporation secures such private easements or facility sites through eminent domain proceedings.
- b. The Corporation shall require an exclusive dedicated right-of-way easement on the Applicant's property (as required by the size of the planned facilities and as determined by the Corporation) and title to property required for other on-site and off-site facilities.
- c. Easements and facilities sites shall be prepared for the construction of the Corporation's pipelines and facility installations in accordance with the Corporation's requirements and at the expense of the Applicant.

**9. *Bids For Construction.*** – The Corporation's Consulting Engineer shall advertise for bids for the construction of the Applicant's proposed facilities in accordance with generally accepted practices. Plans and specifications shall be made available, with or without charge (as per Engineer's determination), to prospective bidders. Although the Corporation reserves the right to reject any bid or contractor, the Corporation shall generally award the contract to the lowest qualified bidder in accordance with the following criteria:

- a. The Applicant shall sign the Service Contract noting willingness to proceed with the project and shall pay all costs in advance of construction associated with the project;
- b. The Contractor shall provide an adequate bid bond under terms acceptable to the Corporation;

The Contractor shall secure adequate performance and payment bonding for the project under terms acceptable to the Corporation;

- c. The Contractor shall supply favorable references acceptable to the Corporation;
- d. The Contractor shall qualify with the Corporation as competent to complete the work (including but not limited to current water/sewer license, OSHA competent person training, and other licenses / certificates as required to complete the project); and
- e. The Contractor shall provide adequate certificates of insurance as required by the Corporation.

**10. *Pre-Payment For Construction and Service.*** – After the Applicant has executed the Service Agreement, the Applicant shall pay to the Corporation all costs necessary for completion of the project prior to construction and in accordance with the terms of the Non-Standard Service Contract.

**11. Construction.**

- a. All roadwork pursuant to state, county and/or municipal standards (as applicable) shall be completed prior to facility construction to avoid future problems resulting from road right-of-way completion and excavation. Subject to approval of the requisite authority, approved road sleeves /casings may be installed prior to road construction to avoid road damage during construction of Applicant's facilities.
- b. The Corporation shall, at the expense of the Applicant, inspect the facilities to ensure compliance with Corporation standards.
- c. Construction plans and specifications shall be strictly adhered to, but the Corporation reserves the right to issue change-orders of any specifications, due to unforeseen circumstances during the design phase, to better facilitate construction or operation of the Applicant's facility. All change-order amounts shall be charged to the Applicant.

**PART II. Request for Service to Subdivided Property**

**This section contains additional requirements for applicants that are developers as defined in Section C Definitions.**

1. **Sufficient Information** - Applicants shall provide the corporation sufficient information describing the level and manner of service requested and the timeline for initiation of this service. The following is the minimum information needed for an engineering evaluation of the requested service to the property described in the application.
  - a. Completion of requirements described in Section F Part I, including completing the *Non-Standard Service Application*.
  - b. Applicant shall provide the Corporation with details concerning access to the property during evaluation of application.
  - c. Applicant shall be notified in writing by the Corporation or designated representative if service can be extended in accordance with the details described on the Applicant's request for service.
2. **Service within Subdivisions** – The Corporation's obligation to provide service to any customer located within a subdivision governed by this Section is strictly limited to the level and manner of the nonstandard service specified by the Applicant. The Applicant is responsible for paying for all costs necessary for non-standard service to a subdivision as determined by the Corporation under the provisions of this Tariff and specifically the provisions of this Section; if the Applicant fails to pay these costs, the Corporation has the right to require payment of these costs by any one or more of the persons purchasing lots or homes within such subdivision before the Corporation is obligated to provide water/sewer service (Texas Water Code Section 13.2502). In addition, Corporation may elect to pursue any remedies provided by the Non-Standard Service Contract if one has been executed. Applicant is advised that purchasers of lots also may have legal recourse to the Applicant under Texas law, including but not limited to Texas Water Code Section 13.257, and the Texas Business and Commerce Code Chapter 17, Subchapter E Deceptive Trade Practices & Consumer Protection Act.
  - a.) The Applicant must provide the following in addition to all other information otherwise required by this Section:

- i. Map and legal description of the area to be served using map criteria in 30 TAC 291.105(a)(2)(A-G)).
- ii. Time frame for:
  - a. Initiation of service
  - b. Service to each additional or projected phase following the initial service
- iii. Detailed description of the nature and scope of the project/development for:
  - a. Initial needs
  - b. Phased and final needs, including a map showing each phase, and the projected land uses that support the requested level of service for each phase
- iv.
- v. Flow and pressure for anticipated level of fire protection requested, including line size and capacity
- vi. Specific infrastructure needs for anticipated level of fire protection requested, including line size and capacity
- vii. Any additional information requested by the Corporation necessary to determine the capacity and the costs for providing the requested service.
- viii. Copies of all required approvals, reports and studies done by or for the Applicant to support the viability of the proposed development.

Applicant must provide reasonably sufficient information, in writing, to allow the Corporation to determine whether the level and manner of service specified by the Applicant can be provided within the time frame specified by the Applicant and to generally determine what capital improvements, including expansion of capacity of the Corporation's production, treatment and/or storage facilities and/or general transmission facilities properly allocable directly to the service request are needed. If the Applicant proposes development in phases, the Applicant should specify the level and manner of service and the estimated time frame within which that service must be provided for each phase, and the Applicant must depict the currently estimated location of each phase on the maps required under 30 TAC Section 291.105(a)(2)(A-G). It is important that the Applicant's written request be complete. A complete application by the Applicant should include:

- (a) the proposed improvements to be constructed by the Applicant;
- (b) a map or plat signed and sealed by a licensed surveyor or registered professional engineer;
- (c) the intended land use of the development, including detailed information concerning the types of land uses proposed;
- (d) the projected water demand of the development when fully built out and occupied, the anticipated water demands for each type of land use, and a projected schedule of build-out;
- (e) a schedule of events leading up to the anticipated date upon which service from the CCN holder will first be needed; and
- (f) a proposed calendar of events, including design, plat approval, construction phasing and initial occupancy.

Applicant must establish that current and projected service demands justify the level and manner of service being requested. In making his/her written request for service, the Applicant must advise the Corporation that he/she may request expedited decertification from the TCEQ.

Upon payment of the required fees, the Corporation shall review Applicant's service request. If no additional information is required from Applicant, the Corporation will prepare a written report on Applicant's service request, subject to any final approval by the Corporation's governing body (if applicable) which must be completed within the 90 days from the date of application and

## GANAWAY

From Page 18

gymnast on the Venezuelan national team, are raising four children.

Ganaway was recently named a first-team running back on Baylor's all-decade team chosen by the Tribune-Herald and members of the university's athletic department. Since 2011, he's been part of KWTX's program show for Baylor football games.

"It's given me an opportunity to educate viewers on football," Ganaway said. "I can give people an idea of what's happening between the lines from a unique perspective. I'm a teacher at heart. I like education and football."

Ganaway's college football journey began at Houston where he played under Art Briles. He made a quick impact as he rushed for 550 yards and scored six touchdowns for the Cougars as a freshman in 2007.

But he thought his football career was over when he left Houston in 2008 to go to Baylor. He was a walk-on at Baylor when his mother died from liver cancer at age 48. He

Staff photo — Jerry Larson

Former Baylor running back Terrance Ganaway (24) earned his MBA and now lives with his wife and four children and is an account manager with Stryker Corp. in Flower Mound.

grew up in a large family with 10 brothers and sisters and his father needed help.

He earned his associate's degree from nearby Texas A&M University.

When Briles asked him if he wanted to give football another shot at Baylor, he accepted the offer. Briles had lost both

of his parents in a car accident in 1976 when he was a college football player at Houston.

"He had lost his parents at a young age, and I was going through it," Ganaway said.

Ganaway had to restart his career from the ground

up. Playing behind Fatsky, he rushed for 300 yards and five touchdowns in 2009 and 210 yards and two scores in 2010.

Those seasons were a prelude to his phenomenal senior year when he rushed for 1,547 yards to break Finley's school record of 1,218 yards set in

2010. "I was able to break rushing records simply because we had guys up front blocking their tails off and gave Robert (Griffin III) time to throw," Ganaway said. "Those guys up front played hurt and fought hard all the time. I was blessed to have played on a great team."

Ganaway was one of the many weapons that surrounded Baylor's Heisman Trophy winning quarterback. Despite his accolades and incredible talent, Griffin never said like he was the star.

"Robert did whatever we did, pulling the sleds, lifting weights," Ganaway said. "He held everybody accountable, but he wasn't a prima donna. Our attitude was that we were going to outwork everybody. We thought we were the strongest and best conditioned team."

Ganaway went out in style in his final college game as he exploded for 200 yards rushing and five touchdowns to earn offensive MVP in Baylor's 59-0 win over Washington in the 2011 Alamo Bowl. His 14-yard touchdown run with 228 remaining sealed

the win for the Bears.

After dropping a 35-14 decision to Illinois in the 2010 Texas Bowl, the Bears were determined to go out on a much more positive note in the Alamo Bowl.

"It was such an emotional game," Ganaway said. "In our first bowl, we weren't focused. It was like let's put each other on the back and sing a celebratory song. So winning was a big deal in the Alamo Bowl. It was a crazy game with a lot of punts. Coach Hiles and (former Baylor offensive coordinator) Philip Montgomery had an idea of how to attack the Washington defense and how we could push them on the ground."

Ganaway was taken in the sixth round of the 2012 draft by the New York Jets, but was waived and picked up by the St. Louis Rams. He announced his retirement in 2013 to pursue his MBA, and is glad he can make an impact in the business world.

"I knew I wanted to do something more than football," Ganaway said. "I wanted to finish my MBA and become a professional. I wanted to help men and women in a professional space."

## JOHNSON

From Page 18

at Indianapolis Motor Speedway.

Johnson won't be cleared to race until he tests negative twice in a 14-day span. Johnson is expected to be released this week in an effort to get back in the No. 48 Chevrolet for Sunday's race at Kentucky Speedway.

This farewell party has been an absolute bust, but Johnson isn't feeling sorry for himself.

"I can be down and out on my situation, but if I turn on the news and I see how this virus has impacted so many others, I quickly feel thankful that I'm not in a major issue," Johnson said. "We're hopeful that through our situation that maybe some others can learn from this as well."

Both Johnson and his wife, Chant, tested positive. He said their two young daughters tested negative.

The positive test stunned Johnson, a fitness buff who has studied nutrition, cycled

through the mountains with Lance Armstrong, swam with Olympians and completed the Boston Marathon. He studied his family, led by "rule follower" Chant, was diligent in trying to protect themselves from the virus and have no idea how it was contracted.

In fact, in his competitive days as a triathlete, Johnson was tested for antibodies in the early days of the pandemic. He tested positive, which he believed gave him a "false base," but now understands the testing at that time may not have

been accurate. So Johnson is the first NASCAR driver to test positive — the last one anyone would have expected — and understands that it gives him an opportunity to educate others on COVID-19.

In his 16th and final full season, Johnson has found his voice and has been a leader for the industry on and off the track. Although he has always been a philanthropist — the Jimmie Johnson Foundation has donated nearly \$6 million to K-12 schools and other organizations — the last back

California morphed into a polished corporate spokesman as he backed up 68 Cup wins and led Hall of Famers Richard Petty and Dale Earnhardt with three screen championships.

But Johnson rarely said anything controversial and stayed on message, careful not to waste time on topics that could cause him problems with his sponsors or his team. Now 41, he has reversed course and taken a very prominent role in NASCAR's push for diversity.

Johnson was one of the leaders of a video drivers

made during the nationwide unrest following George Floyd's death while in the custody of Minneapolis police. When the industry learned a race had been found last month in Bubba Wallace's garage at Talladega, it was Johnson who his peers that he planned to stand alongside Wallace during the national protest. His idea spawned an unforgettable moment of unity in which all the drivers pushed Wallace's car to the front of the grid and stood behind him.

## Notice of Requirement

NOTICE OF REQUIREMENT TO COMPLY WITH THE SUBDIVISION AND SERVICE EXTENSION POLICY OF LEVI WATER SUPPLY CORPORATION

## Legal Notices

## Pursuant to Chapter 13.002 of the Texas Water Code

Pursuant to Chapter 13.002 of the Texas Water Code, Levi Water Supply Corporation hereby gives notice that any person who subdivides land by dividing, lot, tract, or parcel of land, within the service area of Levi Water Supply Corporation, including the subdivision of land for which a plat has been filed and recorded or required more than two or fewer sewer connections in a single contiguous tract of land must comply with the latest subdivision and service extension policy and standards set forth in the Levi Water Supply Corporation's policy.

## Legal Notices

## Levi Water Supply Corporation

Levi Water Supply Corporation is not required to extend water or sewer utility service to a service area that is not within the service area of the developer of the subdivision as the subdivision has been subdivided.

## Legal Notices

## Applicable elements of the subdivision include:

Evaluation by Levi Water Supply Corporation of the impact of proposed subdivision service extension will make on Levi Water Supply Corporation's water supply and payment of the costs for the evaluation.

## Legal Notices

## Payment of reasonable costs or fees by the developer for providing water supply capacity.

Payment of fees for reserving water supply.

## Legal Notices

## Forfeiture of reserved water supply capacity for failure to pay applicable fees.

Payment of costs of any improvements to Levi Water

## Legal Notices
